

SUBMERSIBLE MIXERS

Submersible mixers used for removal of sedimentary deposits, for homogenisation of heavy sludge or liquids with high solids contents.

TECHNICAL DATA

- Maximum temperature of the liquid: 40°C
- Asynchronous motor
- Insulation class H
- Protection degree IP 68
- 400/690V $\pm 10\%$,50Hz three phase voltage

MATERIALS

- Pump body available in cast iron and steel
- Propeller in AISI 316
- Shaft in AISI 420
- Mechanical seal: Silicon Carbide/Silicon Carbide and Silicon Carbide/Carbide/FPM
- Cable: Neoprene H07RN/F
